Subject: Clean Energy Systems

Hi John/Emily, I hope you are both well. At last month's UIC meeting, we discussed setting up a call with CA agencies to discuss the CES Class VI project, which I have not done. Our contractor is continuing to review the application, and we did have a check-in call with them a week or two ago to hear how the review is going. Their initial focus has been on the geologic site characterization, but they are also reviewing other aspects of the proposal. I'm happy to set up a meeting, and we could have our contractor join the call. However, I'd like to understand what topics you would like to cover, and I'd note that our technical work is still in progress so we would not have a lot to report out on. That said, if the state has particular questions and/or issues to raise based on your review to date, it would be helpful to hear them. Let me know your thoughts on this and if there are dates/timeframes that would work better for you.

Thanks,
David
